

Project Experience

Project Title: Delta South Quarters Project

Client: Chevron Nigeria Limited/DeltaAfrik

Scope: Detailed Engineering Design

Date: Jan 2007 – May 2007

Field Location: Delta South, 13 Km NW Escravos

Man Hours: 3,159

PROJECT DESCRIPTION

Chevron Nigeria Limited intends to install a new quarters platform at Delta South Field. Delta South is located in shallow waters of about 13 Km northwest of the Escravos Terminal and the current facilities include the Delta South Water Injection Platform (DSWIP) connected by bridges to an Injection Pump Platform and a Living Quarters (DSWIP LQ) Platform. The DSQ project involve detailed engineering design of the new 4-pile steel jacket sytem with ancillary deck, sump deck, boat landing, and bridge connection to the existing DSWIP LQ platform and associated utility systems.

SEAMETRIC SCOPE

Seametric's scope of work on the project, as a Subcontractor to DeltaAfrik, include conducting Technical/Quality Assessment of the process engineering deliverables on the project, and provision of personnel support to the project.
